PROFESSIONAL SUMMARY

Full Stack Engineer with 8+ years of experience building scalable, high-performance web applications using PHP (Laravel), React.js, and modern JavaScript. Proven ability to enhance system performance and user experience through clean architecture, optimized APIs, and intuitive UI components. Skilled in Agile, CI/CD workflows, Docker, and AWS infrastructure. Passionate about contributing to mission-driven platforms, especially in education and AI innovation. Actively leverage AI tools such as ChatGPT, Deepseek, and GitHub Copilot to accelerate development, generate documentation, and support test-driven development.

TECHNICAL SKILLS

Frontend Development: ReactJS, VueJS, NextJS, JavaScript, TypeScript, HTML5, CSS (Tailwind, SCSS, Bootstrap), Redux, Zustand, Context API, React Query

Backend Development: PHP (Laravel, Symfony, CakePHP, CodeIgniter), NodeJS (Express.js), MySQL, PostgreSQL, MongoDB, GraphQL, Redis, RESTful APIs

DevOps & Cloud: Docker, AWS (Lambda, S3, EC2), Linux, CI/CD Pipelines, GitHub/GitLab, Elasticsearch

CMS & Tools: WordPress, Craft CMS, Twill CMS, SilverStripe, Agile, Scrum, TDD, Jira, Confluence

AI Tools: ChatGPT, Deepseek, GitHub Copilot

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer (Part-Time)

BigHero Design | January 2023 - Present | Remote

- Lead developer on a Laravel + Vue.js/Livewire-based hotel management platform, focusing on scalable architecture and seamless user experience
- Developed core backend services and integrated responsive front-end components to streamline property booking, reservation, and billing workflows
- Mentored and managed junior developers, conducting code reviews, architectural planning, and Agile sprint coordination
- Designed and deployed RESTful APIs, implemented CI/CD processes, and containerized applications using Docker for staging and production environments

Front-end Developer

Flexisource IT | November 2021 – August 2024 | Remote

- Migrated legacy React codebase to TypeScript, improving maintainability and reducing bugs
- Implemented dynamic ReactJS features in collaboration with product/design teams, increasing user engagement
- Optimized GraphQL queries and caching for faster data-fetching and load speed
- Contributed to Dockerized CI/CD pipelines and improved feature delivery times

Senior Full Stack Developer

Next Click Partners, LLC - Chicago, IL | October 2020 – October 2021 | Remote

- Worked for a lead generation and advertisement company, handling various parts of the system from frontend to backend
